

::: TRENNLACK

Description:

Liquid release agent based on polyvinyl alcohol (PVA) dissolved in water. Should always be used in combination with a release agent. Available in 0.5 lt, 1 lt, 5 lt and 20 kg packaging.

Application:

To obtain a better unloading of GRP products. As an additional release agent for polyester gelcoat when manufacturing moulded parts.

Data on delivery:

Color:	transparent
Viscosity:	180 mPas
Mass density:	approx. 1.1 g/cm ³
Shelf life:	12 months in closed packaging
Consistency:	liquid

Technical data:

Consumption:	50gr/m ²
Shore:	not applicable

Processing:

After applying loose wax, apply loose wax using a sponge or brush (possibly a sponge covered with a nylon stocking). It is best to apply this in the thinnest possible layers and let it dry for 30 minutes. The material can be removed afterwards with warm water. Diluting before spraying is possible with water. When using a solid wax, we recommend Premium Release Agent.

Safety:

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: water.
