

:: LATEX THICKENER

Description:

Is an additive for the latex moulding rubber. It is used to thicken the rubber without affecting the tear resistance or the quality of the final product.
Available in 0.5 lt and 1 lt.

Application:

By adding the thickener you can build up a layer thickness faster. The mixture sinks less quickly and is still easy to process.

Data on delivery:

Color:	colourless
Viscosity:	600 MPa
Mass density:	approx. 1,0 gr/cm ³
Shelf life:	12 months in closed packaging
Consistency:	liquid/thixotrope

Technical data:

Consumption:	10-30%
Shore:	45

Processing:

Mix the latex thickener under the latex rubber in a 10-30% ratio. Never use the thickener alone. Waiting time between coats: 20-25 min (depending on temperature).

Safety:

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: ammonia or water.
