

## ::: ANTISKID POWDER

### *Description:*

White granulate for making smooth surfaces non-slip. Made of a synthetic granule with a diameter of 0.2 - 0.3 mm. Available in 50 g and 500 g packages.

### *Application:*

Anti-slip granulate is used in combination with urki-voc, urki-nato, estovoss, G8 super and Antislip Coating. The product is applied on the surface or mixed under the lacquer in order to obtain a soft-touch anti-slip layer on e.g. surfboards, boats, etc...

### *Data on delivery:*

Color:	white
Viscosity:	not applicable
Mass density:	approx. 0.9 g/cm <sup>3</sup>
Shelf life:	unlimited
Consistency:	powder

### *Technical data:*

Consumption:	5% by weight in case of lacquer
Shore:	not applicable

### *Application:*

Can be applied by mixing under the varnish or by sprinkling in the first layer (which is slightly attracted). After curing, you obtain a completely neutral product that may come into contact with foodstuffs. Anti-slip granulate takes on the colour of the lacquer.

### *Safety:*

Cleaning agent for tools: water and soap.
